SUMMARY

AI Product Manager driving product strategy and AI agent workflow development for LLM-powered solutions. Delivered a finance exception review system that cut analyst manual effort by 25% and built custom MCP servers that saved 2,600 manual hours and \$120K annually. Expert in prompt design, agile execution, and A/B testing to boost user engagement and adoption. Seeking to apply proven AI product expertise to accelerate innovative, data driven products and measurable business outcomes.

EDUCATION

University of Arizona - Eller College of Management | Tucson, AZ **Aug 2025 – Dec 2027**
MBA(Marketing), Business Administration and Management and M.S. Management Information Systems GPA: 4/4
Coursework: Marketing Analytics, AI for Business Intelligence, Information Systems Analysis & Design, Enterprise Data Management
MIT – World Peace University | IA **Aug 2018 – May 2022**
Bachelors of Science in Electronics and Telecommunication Engineering GPA:3.9/4

SKILLS

Product Management: Product Requirements, User Stories, Journey Mapping, Market Research, Product Strategy Support, Feature Prioritization, Cross-Functional Alignment, Agile Scrum/Kanban, SDLC, New Product Introduction(NPI), PLM
Gen/Agentic AI: Lang Chain, Lang Graph, RAG, MCP, Cursor, Azure OpenAI, NLP, LLM, N8N, Prompt Design, Crew AI, Vercel, Lovable, Replit
UI/UX: Wireframing, A/B Testing, Usability Analysis, User Needs Assessment, Workflow Mapping, Requirements Documentation
Languages & Analytics: SQL, Python, R, Power BI, Tableau, Mix panel, Snowflake, Excel
PM Tools: JIRA, MS365, Confluence, Figma, Asana, Claude Code/CoWork, MSCopilot Studio, Salesforce CRM, Open Claw

WORK EXPERIENCE

Grace Hill | AI Product Manager Intern | TX **Jun 2026 – Aug 2026**

- Owned & shipped 2 **custom MCP servers** orchestrating Claude tool calls across 5+ systems for multifamily customer/portfolio investigations, defining tool surfaces, access controls, evals for **100+ users**, saving 2600 manual hours & ~\$120K in annual support costs.
- Led the launch of an agentic AI property-data reconciliation workflow for **4500+ customer accounts**, using Amazon Bedrock, AWS Lambda/S3, and n8n for orchestration, automating HITL approvals & **cut unresolved backlog 64%** in 5 weeks.
- Developed an **automated NPS intelligence product** analyzing **15K+ responses** weekly across **5 product lines and 17 attributes**, enabling **50+ Product/Ops users** to surface segment-level customer trends while saving 3–4 analysis hours weekly.

Morgan Stanley |AI Product Manager | IA **Sep 2023 – Jun 2025**

- Built an **LLM-based** finance exception-review workflow by defining product requirements, combining embedding-based similarity and anomaly detection to prioritize high-risk items, reducing manual intervention of analyst by 25%
- Developed **Kanban boards** in **JIRA** by breaking down engineering tasks, updating status, escalating blockers and architected **15+ risk and performance KPIs**, improving visibility and reducing downstream issues by 30%.
- Spearheaded post-launch **A/B testing & performance analysis** for Document Classifier, utilizing **Mixpanel & Snowflake** to perform Clustering and Sequence Mining on **20K+ user journeys**, led to a 15% increase in daily active usage.
- Implemented **Lang Graph-orchestrated AI agents(Azure OpenAI +RAG)** to automate compliance data validation & produce audit-ready reports, **using human-in-the-loop approvals** lowering regulatory risk by **\$180K**, and cutting onboarding delays by 25%.
- Assisted senior PMOs in product launch lifecycles through QA testing and release documentation, resolving legacy **SQL-driven reporting issues**, improving reporting accuracy by **80%** and cut executive escalations by 40%.
- Collaborated with Data scientists to redesign and deliver an **NLP-based alert prioritization feature, leveraging text classification and ranking models**, reducing false-positive alerts by **22%** & improving review cycle time by 35%.

Nice Interactive Pvt Ltd | Junior Product Manager | IA **Jun 2022– Jul 2023**

- Developed **Power BI dashboards** that tracked SLA adherence and case-resolution metrics, providing insights that raised usability scores by 15% and reduced user errors in case evaluations by **30 errors per month**.
- Drove UI improvements for a fraud-detection case-management tool by simplifying navigation and reviewing **Figma** wireframes with design, reducing investigation time by **25%** and cutting clicks per case by **20%**.
- Coordinated project execution through **Excel and JIRA dashboards** and facilitated daily standups, sprint planning, and retrospectives; increased on-time delivery of user stories by 35% and **reduced follow-up delays by 25%**.
- Conducted VOC research & competitive analysis, refining fraud-detection logic and decision flows that prevented **\$200K+ in losses & improved experience** case review experience by **15%**.
